# What is the PMP?

# What is the PMP?

- A statewide electronic database which collects designated data on the dispensing and distribution of controlled substances. Data is viewed by individuals who are authorized under state law to receive the information.
- The registry includes patient-specific information on dispensed controlled substances.

# What is the PMP?

- Patient data is derived from pharmacy or practitioner dispensing information.
- Accurate pharmacy data entry is a must!
- 1 year of patient history is displayed.
- Data is visible within 24 hours of submission to BNE.

# What is the PMP?

Health care practitioners can use the PMP to:

- Better evaluate patients' treatment with controlled substances
- Determine whether there may be misuse of controlled substances
- Reduce diversion of controlled substances by identifying individuals potentially engaged in 'Doctor Shopping'

# History of the NYS PMP

- **1972:** pharmacies required to report dispensed controlled substance prescription information (Schedule II drugs only).
- **June 2005:** pharmacies required to report dispensed CS prescription records (Schedules II-V, monthly).
- **April 2006:** all prescriptions required to be written on the New York State serialized and forge-proof Official Prescription Form (with limited exceptions).

# History of the NYS PMP

- **February 2010:** On-Line PMP is available to prescribers.
- **August 27, 2013:** The updated PMP goes live.
  - Pharmacies and dispensing practitioners required to report all controlled substance prescription data daily.
  - Prescribers are required to access the PMP prior to writing a controlled substance prescription.
  - Pharmacists are allowed to view the PMP Registry prior to dispensing a controlled substance prescription.

# Who Can Access the PMP?

- On August 27, 2013, the updated PMP and the mandatory duty to consult for practitioners was officially implemented
- Practitioners must consult the registry in most cases prior to prescribing or dispensing any controlled substance listed in Schedule II, III, or IV
- The data considered by the practitioner must be obtained from the PMP Registry no more than 24 hours before the prescription is issued
- Practitioners do not need to include a reference that they checked the PMP on the prescription
- Pharmacists are encouraged but not mandated to consult the PMP Registry

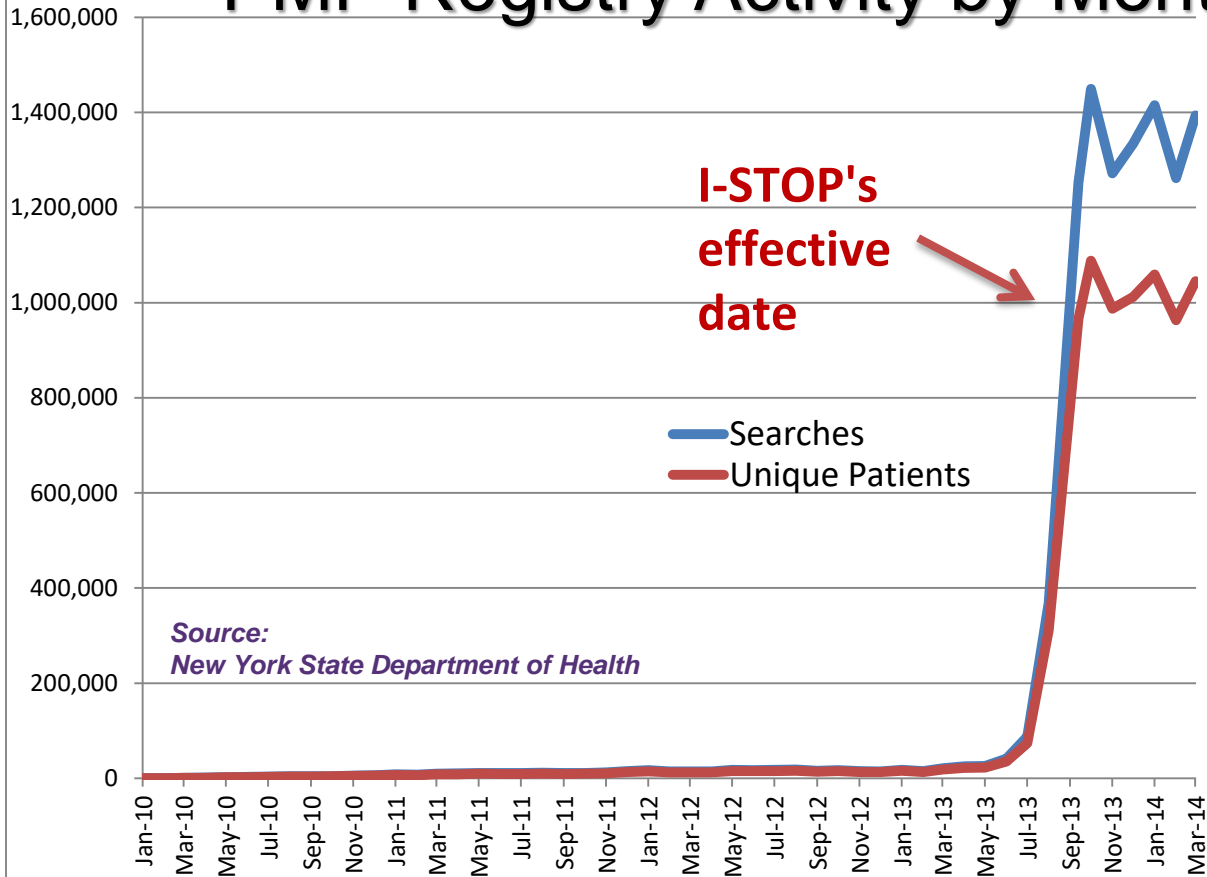

# PMP Data Submission

After receiving controlled substance prescription data, BNE:

- De-duplicates any identical records;
- Matches new record to existing patient records;
- Presents new record in the PMP Registry;
- Screens all records for warnings and errors;
- Rejects any record containing an error;
  - Records with errors are **NOT** uploaded to the PMP Registry
  - Errors shall be corrected within 72 hours

This process takes about 2 hours from when BNE receives the original record.

# PMP Registry Activity by Month

# PMP Usage

- **Prior to Mandated Duty to Consult:** (2/16/2010 through 8/26/13)
  - Only **950,000** searches by **19,000** users for **202,714** patients.
- **After the Mandated Duty to Consult:**
  - Over **47** searches have been handled **per second**.

Year	Number of Searches	Number of Unique Users Searching	Number of Unique Patients Searched
2014	16,810,573	68,291	5,974,020
2015	18,145,771	69,598	4,704,346
2016	18,364,788	70,722	4,564,881
2017	18,739,213	73,322	4,490,047
2018	19,076,547	72,731	4,411,199

# Interstate Sharing of Prescription Monitoring Program Data

# Access to Other States PMP Data

- Not all states share their PMP data with other states
- Practitioners or users/designees in New York may or may not have access to view other states' PMP data, and that access depends on what access is legally allowed in the other states. For example, some states may not allow a designee or pharmacist access.
- In New York State's PMP, the other states' data will display in the same manner as the New York data appears.
- The information New York requires may not be displayed in the other state's data if that information is not required by the other state. Such as:
  - Certain schedules – other states may only require CII data
  - Payment Type

This list continues to grow as the Bureau adds more states. Pharmacists & practitioners have a choice of which states to search.

Patient Name: Jack Spratt Birth Date: 01/02/1970  
Address: 00-00 1ST AVE SOMEWHERE, NY 00000 Sex: Male

Rx Written	Rx Dispensed	Drug	Quantity	Days Supply	Prescriber Name
09/25/2017	09/28/2017	ambien 5 mg tablet	30	30	Yet, Another X MD
09/21/2017	09/22/2017	ambien 5 mg tablet	5	5	Yet, Another X MD
03/27/2017	03/30/2017	ambien 5 mg tablet	30	30	Yet, Another X MD
03/23/2017	03/24/2017	ambien 5 mg tablet	5	5	Yet, Another X MD

\* - Drugs marked with an asterisk are compound drugs. If the compound drug is made up of more than one controlled substance, then each controlled substance will be a separate row in the table.

# Enhancements and Education

# Developing Mobile Friendly PMP

- Redesigned Using Responsive Design Technology.
- Focus Group of Practitioners 12/7/2016; + Feedback.
- Created new FAQs – posted to website. Example:
  - Q: I no longer see the tabs at the top of the PMP Registry, how do I navigate?
  - A: On smaller mobile devices, the tabs are collapsed into an icon that consists of three parallel horizontal lines, ☰, frequently referred to as the ‘hamburger’ menu.

## PATIENT SEARCH

Want to search for more than one patient?  
Use the [Multi-Patient Search](#) page.

**First Name\*:**

**Last Name\*:**

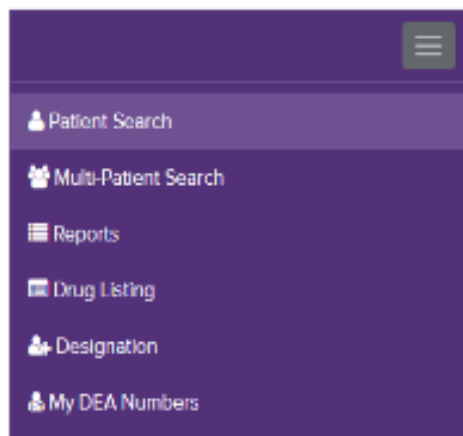

**Birth Date\*:**

Please ensure that the patient information  
entered above is correct.

Do you attest to abide by the  
guidelines as specified?

Yes

## PATIENT SEARCH

Want to search for more than one patient? Use the [Multi-Patient Search](#) page.

## Home Study The New York State Prescription Monitoring Program (PMP)

**Welcome to this enduring program. Please review the complete program information by selecting the above information tab before registering.**

### **Attention Prescribers - How to Register: (There is no fee associated with this program)**

In order to ensure receiving your ACCME credit and letter of completion, before registering for this program you must create an account in order for us to complete your credit claim document. You only need to complete this step once, and then you will be on file for all future programs. Simply click on "Register" in the upper right hand corner of this page and enter your information. Make sure to choose the appropriate account type-MD, DDS NP, PA, etc... Once you have set-up your UB CE account, you can then enroll and begin the program.

Prescribers and medical residents please note you are listed below as "All Other" in the payment section below.

**Attention Pharmacists** - Be sure you have an account. Once you successfully complete all components of the program your ACPE credit will be automatically uploaded to the CPE Monitor.

# Electronic Prescribing

# Electronic Prescribing

Year	Electronic Prescriptions	Paper Prescriptions	Total Prescriptions	% Electronic Prescriptions
2014	30,237	23,915,517	23,945,754	0.13%
2015	3,978,568	19,997,372	23,975,940	16.6%
2016	16,859,189	6,547,127	23,406,316	72.0%
2017	20,007,917	2,941,133	22,949,050	87.2%

# Electronic Prescribing

Since March 27, 2016:  
Reports of Lost/Stolen Prescriptions

70%

# Doctor Shopping Incidents Down

- **1Q 2016**: Doctor-shopping incidents down about 90% from 8/27/13 -- when checking the PMP became mandatory for all controlled substance prescriptions.
- **2Q 2016**: (First full quarter of e-prescribing) -- Doctor-shopping incidents down 98%. Sustained through 4Q 2018.

# Doctor Shopping Activity in New York

**New PMP  
Registry  
implemented  
August 2013**

**Dr. Shopping  
in NYS is  
down by over  
98%.**

**Patients with prescribed opioids from five or more prescribers and dispensed at five or more pharmacies in a six-month period per 100,000 population**

# Take Away Messages

Practitioners must consult the registry in most cases prior to prescribing or dispensing any controlled substance listed in Schedule II, III, or IV

The data considered by the practitioner must be obtained from the PMP Registry no more than 24 hours before the prescription is issued

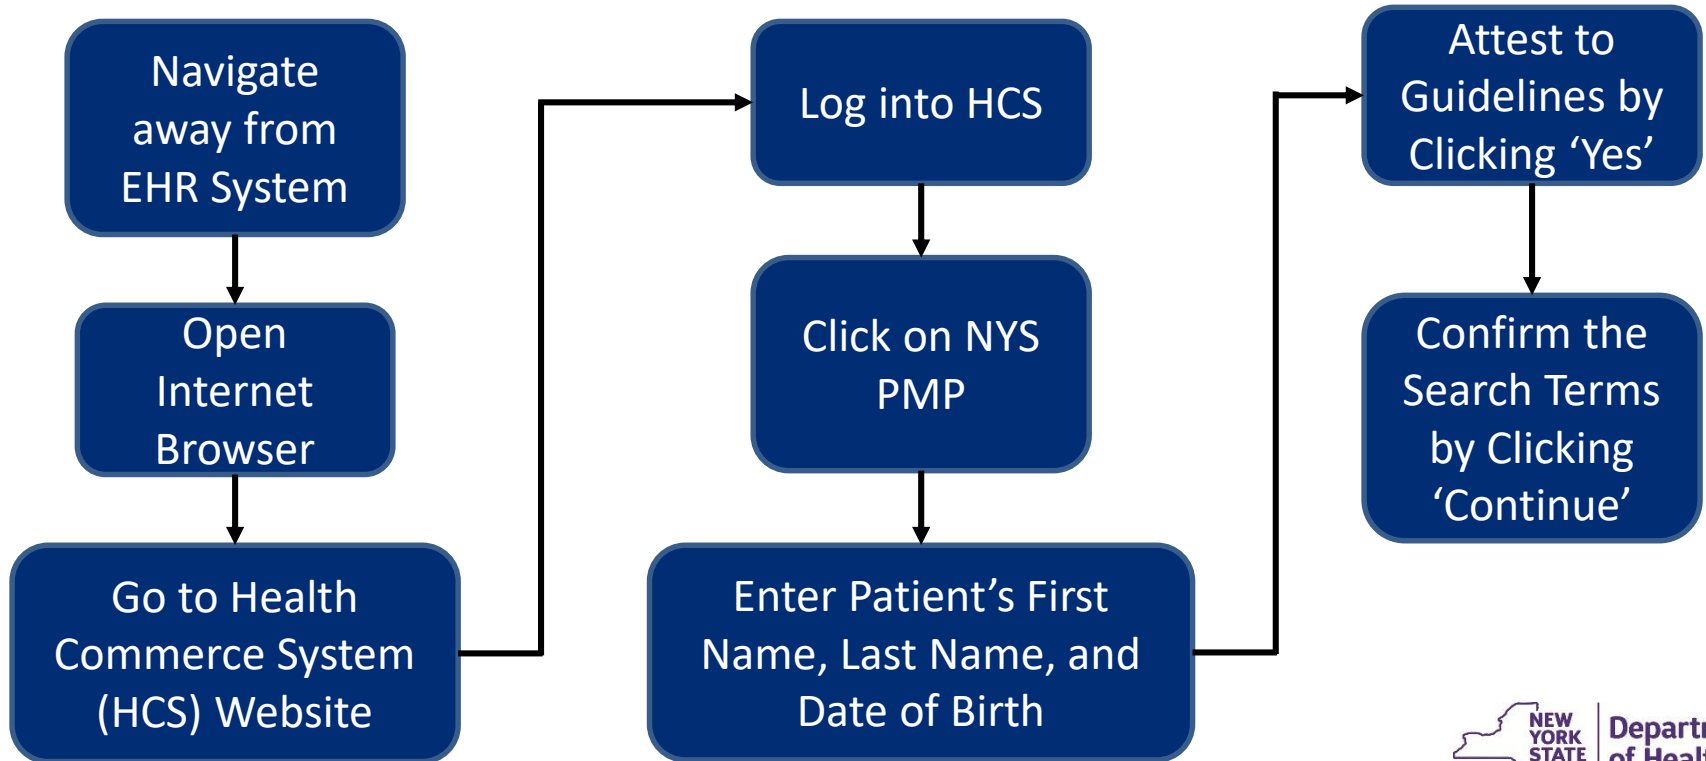

Do NOT share passwords – You may be liable for someone else's actions

# EHR Integration

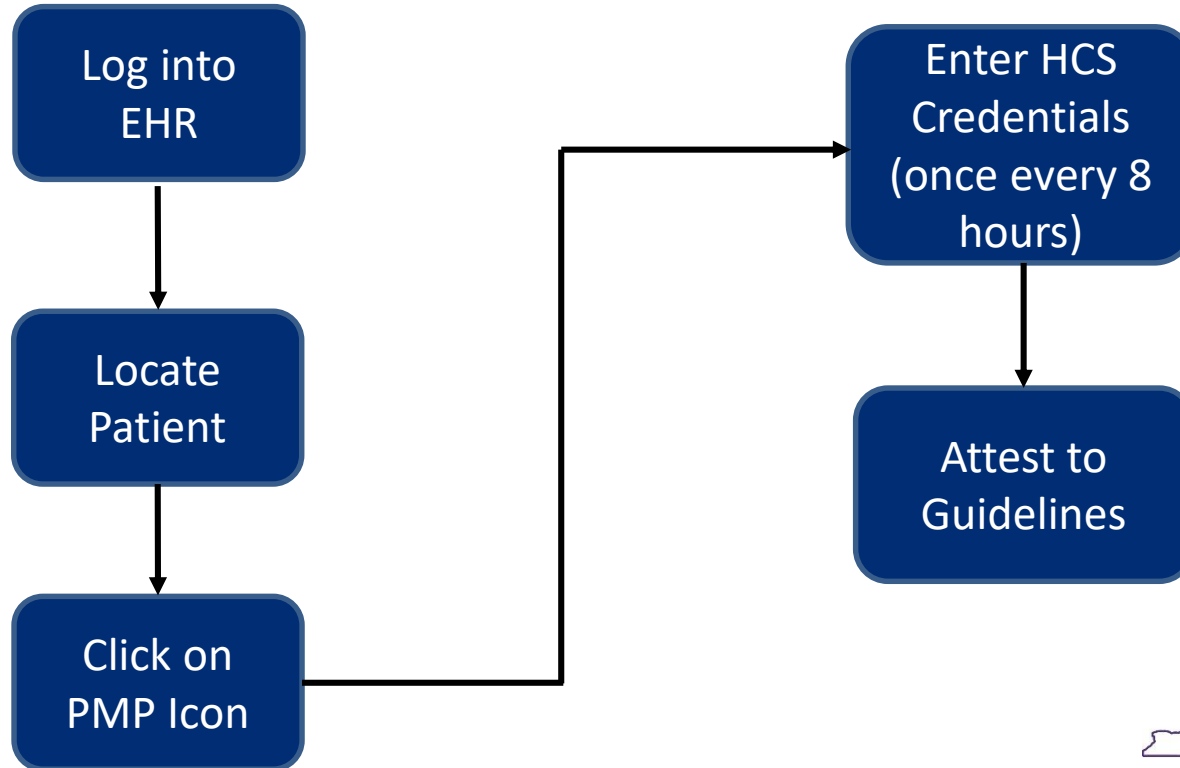

# EHR Integration – Pilot

- Began work with a pilot site in September 2018
- Application Programming Interface (API) service integrated in EHR
- Production: October 2019 with 3 users and expanded to 13 users in December 2019
- Capability to support PMIX 2.0, NCPDP 10.6, and FHIR HL7 platforms

# Current Navigation of the PMP

# Navigation of the PMP through Integration

# EHR Integration – Pilot Feedback

“This **saves me time**, around two and a half minutes per patient search”

“I am now doing more of the I-STOP PDMP checks on my own in the room in front of the patient because it is **so fast and simple**”

“It is **documented in the face to face encounter visit note** that I did check the website”

“**Significantly simplified** this important safety check on patients who are taking chronic controlled substances”

“**Improved my efficiency** in doing this mandatory and necessary work”

# Future Implementation

- Create delegate enhancements (1<sup>st</sup> quarter 2020)
- Establish a consistent set of requirements to safeguard patients' controlled substance data
- Develop technical specifications to allow PMP integration and access within EHR systems
- Onboarding documentation allowing healthcare entities that meet established requirements to implement EHR integration.
- Health care entities that meet and agree to the requirements, can submit a request to BNE for integration
