POWERED BY HEALTHIX DATA

MDLand

The Future of Digital Health

VIPHealth is a cross-platform mobile app designed for patients. Patients can take control of their own health, wherever and whenever, with VIPHealth's physician messaging, and appointment management capabilities and more, from accessing MDLand's medical care to managing their own health.

VIPHealth Mobile App Powered by Healthix Data

MDLand's VIPHealth is a patient centric health management mobile application which effectively streamlines the healthcare process. The application is a user-friendly platform, improving care coordination and enhancing patient care and safety. VIPHealth, powered by Healthix data, makes health data easily accessible to patients. Patients can take control of their own health, wherever and whenever, with VIPHealth's physician messaging, and appointment management capabilities and more.

FAQ's

1. **If a consumer is interested in learning more about VIPHealth, who should they contact?**

   They can contact our VIPHealth customer support team at viphealth@mdland.com

2. **How many patients are currently using the with VIPHealth mobile app?**

   There are nearly 100k patients engaged with the VIPHealth mobile app and several hundred clinics participating.

3. **Can patients schedule their COVID vaccines through the mobile app?**

   Currently, the vaccine portal is limited, based on availability of appointment. There have been a few hundred appointments that were booked thus far, however MDLand is continually working with its partners to expand the coverage when the vaccine is more widely available.

4. What are the benefits of VIPHealth mobile app?

To Consumers:

The VIPHealth mobile app is a patient centric health and wellness empowerment tool that enables patients to take control of their own health: conveniently accessing their health information, communicating with their physicians, and accessing care on demand from the app. Patients can manage their health wherever they are.

- Virtual visits
- Remote monitoring
- Medication management
- Messaging
- Scheduling
- Lab reports
- Visit history
- Vaccination
- Medical folder

To Providers/Healthcare Organizations:

In today's mobile world, digital communication has become essential. VIPHealth enables the provider and healthcare organizations to actively engage with their patients and provide in-culture health services to their patients. The VIPHealth mobile app is easy to use and fully automated. Not only can providers and healthcare organizations generate more value, but they can also streamline clinical workflows. Providers and healthcare organizations can easily be considered for incentive payments under QPP/MACRA, CCM and RPM programs by making the most out of their utilization of the VIPHealth mobile app for patients. The following are achievable with MDLand's VIPHealth mobile app:

- Health outcomes
- Efficient use of healthcare resources
- Care coordination
- Patient engagement
- Patient safety

The VIPHealth mobile app also opens the door for more efficient decision making and patient care, with push notifications, appointment and immunization reminders and more. Providers gain quicker access to new information and patient generated data.
