Social Determinants of Health (SDOH) - Technical Assistance (TA)

This tool is a crosswalk between the PRAPARE tool and its corresponding ICD-10 Z codes in the electronic medical record system (EMR); view the [2022 ICD-10-CM Release](https://www.cdc.gov/icd10/cm/2022-releases/2022-icd-10-cm-release.html). In addition to social risk factor data, it is important to code for social complexities using [ICD-10 Z codes](#) and dummy CPT codes to track, monitor, and close the loop on the services provided to patients with identified social needs. CPT codes, or procedural codes, describe what kind of “procedure” a patient has received while ICD codes, or diagnostic codes, describe any diseases, illnesses, or conditions a patient may have. [PRAPARE](#)/SDOH data & Social Intervention documentation is needed to demonstrate value to payers/stewards and seek adequate financing to ensure interventions are sustainable while creating an integrated, value-driven delivery system to reduce total cost of care. PRAPARE Assessment Tool available at <https://www.nachc.org/research-and-data/prapare/about-the-prapare-assessment-tool/>
