

The New York Statewide HCCN (NYS-HCCN) at CHCANYS

What is the CHCANYS NYS-HCCN?

Established in 2012, the New York Statewide Health Center Controlled Network (NYS-HCCN) is one of forty-nine HRSA funded networks that work together to strengthen and leverage health information technology (HIT) to improve health centers' operational and clinical practices that result in better health outcomes for the communities they serve and is the only HCCN dedicated 100% to New York State CHCs.

The NYS-HCCN is uniquely positioned to help health centers improve quality of care and patient safety by using HIT to reduce costs, improve care coordination, and provide specialized training and technical assistance (T/TA). Access to T/TA and all HCCN programming is available at no charge to participating health centers. For more information or to become a participating health center please contact hccn@chcanys.org.

86% OF ALL FQHCS PARTICIPATE IN AN HCCN NATIONALLY

54 FEDERALLY QUALIFIED HEALTH CENTERS PARTICIPATE IN THE NYS-HCCN

What Training and Technical Assistance is Available?

Webinars

The NYS-HCCN is recognized as a leader in its health IT-related T/TA offerings and regularly hosts webinars on a variety of HIT topics that help to educate and train health center staff.

Workshops

Workshops offer attendees didactic content and include breakout sessions for peer learning and sharing of best practices.

Practice Facilitation

Practice facilitations are structured small group peer learning opportunities that focus on a specific topic allowing interested health centers to work on a shared priority or challenge over an extended period of time.

User Groups

The NYS-HCCN hosts user groups for a number of EHRs in use by health centers and for the CPCI platform. User Groups meet on a regular cadence and are a peer-focused forum for health centers to share best practices and to discuss approaches to reduce staff burden through the optimization of these HIT systems.

Office Hours

Office hours are generally 60-90 minute interactive virtual sessions that provide health centers with an opportunity to dive deeper into specific topics that are timely and relevant to their work.

1-1 Technical Assistance

Leveraging the expertise of the NYS-HCCN staff, one on one T/TA is offered to health centers that focuses on a wide range of HIT topics that are of interest.

Resource Sharing

The NYS-HCCN frequently shares a curated selection of relevant resources in the Clinical and HIT eLibrary that supports and extends T/TA. Recorded webinars and materials from trainings and program offerings are made available to HCCN members.

Toolkits

As curated collections of highly concentrated and adaptable resources are developed, toolkits are one of many resources designed to enable health centers to further explore topic-specific content that helps them translate concepts into practice.

CPCI Financial Subsidies

Throughout the program period, the NYS-HCCN makes available financial subsidies for CPCI add-on services which align with HCCN goals and objective areas. Funding is based upon availability and is first come first served.

What are the Key HCCN Focus Areas?

HRSA has identified the following key focus areas for the 2022-2025 program year

1	2	3	4	5
PATIENT ENGAGEMENT	PATIENT PRIVACY & SECURITY	SOCIAL RISK FACTOR INTERVENTION	DISAGGREGATED PATIENT-LEVEL DATA (UDS+)	INTEROPERABLE DATA EXCHANGE & INTEGRATION
Supporting patients and families' participation in their health care through expanded use of integrated digital health tools	Maintaining formally defined HIT and technology P&Ps that advance security to protect individual privacy and organizational access	Utilizing patient-level data on social risk factors to support patient care planning for coordinated and effective interventions	Developing systems and staff aligned with submitting disaggregated, patient-level data via UDS+	Increasing capacity to integrate clinical information with data from multiple sources across the health care continuum
6	7	8	9	10
DATA UTILIZATION	LEVERAGING DIGITAL HEALTH TOOLS	HEALTH IT USABILITY & ADOPTION	HEALTH EQUITY	IMPROVING DIGITAL HEALTH TOOLS
Using advanced data strategies to support performance improvement and value-based care activities	Supporting providers and staff in achieving and maintaining proficiency in the use of digital health tools	Improving health IT usability and adoption by staff and patients to improve the EHR user experience	Utilizing health IT innovations to reduce health disparities and/or address social determinants of health	Enhancing the quality and coordination of services by focusing on improving the use of digital health tools
