What is the CHCANYS NYS-HCCN?

Established in 2012, the New York Statewide Health Center Controlled Network (NYS-HCCN) is one of forty-nine HRSA-funded networks that work together to strengthen and leverage health information technology (HIT) to improve health centers’ operational and clinical practices that result in better health outcomes for the communities they serve and is the only HCCN dedicated 100% to New York State CHCs.

The NYS-HCCN is uniquely positioned to help health centers improve quality of care and patient safety by using HIT to reduce costs, improve care coordination, and provide specialized training and technical assistance (T/TA). Access to HIT and all HCCN programming is available at no charge to participating health centers. For more information or to become a participating health center please contact hccn@chcanys.org.

What Training and Technical Assistance is Available?

Webinars
The NYS-HCCN is recognized as a leader in health center training and is home to the largest and most diverse library of webinars on a variety of HIT topics that help to educate and train health center staff.

Workshops
Workshops offer a hands-on clinical context to help participants translate concepts into practice.

Practice Facilitation
One-on-one technical assistance is available to help health centers address technical issues and to enable health centers to further explore HIT systems.

User Groups
The NYS-HCCN hosts user groups for a variety of HIT systems. User Groups meet on a regular basis to discuss HIT issues and trends in health center health IT and request training and technical assistance.

Resource Sharing
The NYS-HCCN is uniquely positioned to help health centers improve quality of care and patient safety by using HIT to reduce costs, improve care coordination, and provide specialized training and technical assistance (T/TA).

Office Hours
Office hours are generally 60-90 minute interactive virtual sessions that provide health center staff with the opportunity to engage directly with subject matter experts and ask questions.

Tooltkits
Tooltkits translate concepts into practice. Toolkits are one of many resources designed to enable health centers to further explore HIT systems.

1-1 Technical Assistance
One-on-one technical assistance is available to help health centers address technical issues and request training and technical assistance.

What are the Key HCCN Focus Areas?

HRSA has identified the following key focus areas for the 2022-2025 program year
