NEW YORK STATEWIDE DATA WAREHOUSE

CPCI supports New York State's federally qualified health centers (FQHCs) in clinical practice transformation.

The CPCI data warehouse is a web-based data reporting and analytics solution, licensed from Azara Healthcare.

>40
FEDERALLY QUALIFED HEALTH CENTERS

EST. 2012

The CPCI data warehouse builds upon the electronic health record systems (EHRs), drawing clinical, operational and financial data from EHR and practice management systems nightly.

CPCI is an interactive, visual toolbox. It organizes and presents data to give FQHCs the information they need to allocate resources to maximize their improvement efforts, and enables the sharing of data across health centers to benchmark performance and facilitate collaborative improvement.

CPCI FEATURES

- Clinical Integration, Centralized Reporting and Analytics
- Normalized and Validated Data
- Patient Visit Planning
- Dashboard and Performance Trending
- Registry Reports
- Referral Management Reporting
- Payer Integration – Enrollment, Care Gaps & Claims
- Transitions of Care Reporting
- Cohort Management
- Care Management Passport – Patient Profile
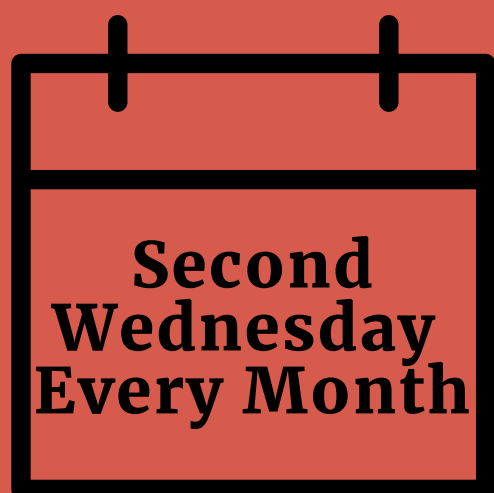

100+ REPORTS

600+ MEASURES

CPCI BENEFITS

- Documented Quality of Clinical Care
- Increase Incentive Payments
- Identify Best Practices and Benchmark for Improvement
- Increase Access
- Care Management
- Population Health Management
- Lower Cost of Care
- Improve Reporting Efficiency With Single Click Reports (UDS, MU, HEDIS, PCMH)

ADD-ON MODULES

- Risk Stratification
- Referral Management
- Controlled Substance
- HEP C & HIV
- DRVS EHR Plug in
- Obstetrics
- Transitions of Care
- Patient Outreach

LEARN MORE ABOUT CPCI

JOIN OUR CPCI USER GROUP!

Second Wednesday Every Month

The CPCI User Group is run by CHCANYS Staff as a forum for health centers to meet and discuss promising practices, challenges and opportunities for optimization of the platform and its uses. During these learning sessions, CPCI users are able to dive deeper into important topics that make the tool as relevant and useful as possible for health centers.
