Transform Your Health Center with CPCI: Your Centralized Data Aggregation Solution for Better Outcomes

COMMUNITY HEALTH CARE ASSOCIATION of New York State

azara healthcare

Join the growing number of FQHCs that are leveraging CHCANYS' Center for Primary Care Informatics (CPCI) to stay ahead of the curve, maximize improvement efforts, and achieve excellence in healthcare delivery. Discover the power of CPCI today and see how data can transform your health center's future.

Choosing CHCANYS Center for Primary Care Informatics (CPCI)

The CPCI data warehouse, powered by Azara Healthcare, is an advanced, interactive web-based platform designed to revolutionize how you use data. Trusted by over 45 New York State Federally Qualified Health Centers (FQHCs) since 2012, CPCI provides a dynamic visual toolbox that turns your clinical, operational, and external data into actionable insights.

CHCANYS provides training and technical assistance on leveraging and optimizing CPCI through bimonthly user groups and other data utilization programming

Features & Benefits

Imagine having instant access to comprehensive, actionable data that empowers your team to make informed decisions, prioritize resources, and drive impactful clinical practice transformation. With CPCI, you can seamlessly integrate data from your electronic health record system, uncover trends, and identify opportunities to enhance patient care, boost operational efficiency, and improve overall health center performance.

Customize CPCI

Clinical Add-on Modules

- Risk Stratification
- Controlled Substances
- HEP C & HIV
- Obstetrics
- Care Management

Improve Reporting Capabilities

Provides seamless clinical integration enabling centralized reporting and analytics

○ Dashboard and Performance Trending
○ Registry Reports   ○ Patient Visit Planning
