

Submit screenings for reimbursement directly in your clinical workflow.

With Hixny, screen for social needs and check prescription history without leaving your EHR.

Scan the QR code to see if your EHR is supported.

Available at no cost while funding lasts

Benefits to you

- Launches within your EHR
- Available regardless of patient consent to participate with QE
- Direct access to the *only* screening tool validated by NCQA that also meets the requirements of NY's 1115 waiver—including transmittal to all **NYS social care networks (SCNs) for reimbursement***
- One click keeps you logged into[†] the NYS prescription monitoring program query tool (*formerly I-STOP*)—no need to re-login for up to 8 hours

NYS Screening Tool (12 questions)

Consent

We use this survey to understand needs our patients have which could interfere with good health. We may share your answers with your other healthcare providers, and with your health plan and social services organizations, so they can determine if you qualify for any free non-medical services that could be helpful. Please check this box if you agree to continue. You can choose not to answer this survey, but we can only check for services if you do answer.

☒ I agree.

☐ I decline.

NYS Prescription Monitoring Program

Search Terms: Kingle, Crystal 12/25/1945 Search Date: 06/13/2023 1:04:34 PM

The Drug Utilization Report below displays all of the controlled substance prescriptions, if any, that your patient has filled in the last twelve months. The information displayed in this report is compiled from pharmacy submissions to the Department, and accurately reflects the information as submitted by pharmacies.

This Report was requested by: Julia Prosk | Reference #: 66050

Patient Demographic Information (PDI):
