

With Nonstop Health™ you can provide better health benefits for less

Nonstop Health is a proprietary health insurance product designed for nonprofits with 50 or more employees on benefits. Nonstop Health provides better health benefits at a lower price point than traditional health insurance plans, while reducing administrative burdens, lowering operational costs and providing all employees access to robust first dollar coverage plan design.

In 2019, Nonstop saved community health centers \$21 million dollars on health insurance premiums* and \$6.9 million dollars in employee out-of-pocket costs.**

CASE STUDY:

In the midst of COVID, Boriken Neighborhood Health Center in East Harlem, New York, reduced their annual employee health benefits spend by more than \$230,000 by transitioning from a traditional fully-insured health plan to the Nonstop Health program.

Benefits of Nonstop Health:

FIRST-DOLLAR COVERAGE

Employees get first-dollar coverage, meaning that they can go to the doctor, get their prescriptions, without a financial burden – no deductibles, no copays, no coinsurance.

EMPLOYER SAVINGS

Employers save 8-10% on premiums compared to a traditional gold-level plan.

FINANCIAL PREDICTABILITY

Health insurance premiums are level-funded with no unexpected variances month to month.

CONTROL OF YOUR DATA

Take control of your health consumption data with real-time reporting on claim expenditures. Use to negotiate better rates and tailor employee education and plan design.
